PROFESSIONAL SUMMARY

Developer and co-founder who ships across three surfaces: native Android apps in Kotlin and Jetpack Compose, React and Next.js web applications, and n8n-based AI automation. Co-founder of LZ Worth, a Delhi studio building websites, apps and AI agents for founders and teams, while working full-time as a web developer at Grivaa Capital. Independently published StreamGarden (Android, Windows and macOS), TrueVault and CopyEye, alongside AI products including StockAnalytix and JanamJyot. Owns delivery end to end.

HIGHLIGHTS

- Published three Android apps and a cross-platform desktop build (Windows and macOS), covering on-device encryption, offline OCR and 4K media processing.
- Co-founded LZ Worth: 14 projects shipped, 9 web applications in production, and AI agents live within 10 days of brief.
- Built StockAnalytix, an AI stock-research terminal spanning US, NSE and BSE markets with screening, alerts and AI research chat.
- Design n8n and Zapier automations that remove roughly 8–10 hours of manual work each week.

TECHNICAL SKILLS

Mobile & Desktop Kotlin, Jetpack Compose, Android SDK, Electron, on-device ML Kit OCR, AES-256-GCM / Argon2id

Frontend React, Next.js, JavaScript, TypeScript, Tailwind CSS, React Native / Capacitor, Responsive Design

Backend & Data Node.js, Supabase, Firebase, REST APIs

AI & Automation n8n, Zapier, Make, AI agents, API integration, workflow automation

Deployment & Workflow Git, Vercel, technical SEO, schema & structured data, Figma, Notion

EXPERIENCE

Co-founder — LZ Worth, Delhi

2026 – Present

- Co-founded a digital studio with two partners and run the build division — websites, Android apps and web applications.
- Shipped 14 client and in-house projects, 9 of them web applications now running in production.
- Deliver AI agents for sales, support, content and ops on a bring-your-own-key model; clients keep the repository, keys and accounts.

Web Developer & AI Automation Specialist — Grivaa Capital

2026 – Present

- Ship and maintain the firm's live web properties (Grivaa Capital, RealtyResolve, founder's site) with React and Next.js, including technical SEO — sitemaps, schema, metadata and Search Console indexing.
- Design and run n8n and Zapier automation systems for lead enrichment, content-to-article generation and scheduling.
- Built internal products now in production: the Grivaa Command Center for social content and analytics, and Creator Tracker, an AI research dashboard deployed on the company subdomain.

Independent Developer & Product Builder — Tech By Vansh (Self-Employed)

2024 – Present

- Published **StreamGarden**, a video and audio downloader for Android, Windows and macOS — merges 4K streams without re-encoding, encodes MP3 with cover art on device, and downloads in parallel ranged chunks.
- Published **TrueVault**, an Android file vault that opens as a working notes app (AES-256-GCM, Argon2id, fully offline), and **CopyEye**, an on-device English and Hindi OCR overlay that copies text from video, images and locked apps.
- Built AI products end to end including StockAnalytix, Vedic Astra and JanamJyot — a full Vedic astrology platform with a shipped APK.
- Produced technical content under the Tech By Vansh brand, reaching 300K+ views.

Additional Experience — Hardware Assembly & Electronic System Design Intern, Allied Engineering Works · Elios Management Consulting

2024 – 2025
